THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

Response to Amendment

1. Applicant's amendment filed 01/14/2008 has been entered and carefully considered.

Claims 1, 23, and 24 has been amended.

Claims 14-22 and 25-28 have been withdrawn.

Claims 29-31 have been added.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 14-22 and 25-28 have been cancelled.

Reasons for Allowance

3. Claims 1-13, 23-24, and 29-31 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The combination as claimed wherein steps of creating defect vector B of n dimensions whose components are the n values in defect array B_i; determining array F_i of n numerical values that characterize a test part that may have an unknown defect using the numerically quantifiable physical property; creating vector F of n dimensions

Art Unit: 2863

whose components are the n values in array F_i ; forming dot product DP as provided in equation: $DP = B \cdot F$ (claim 1, claim 24) is not disclosed, suggested, or made obvious by the prior art of record.

The combination as claimed wherein steps of forming vector E by the method comprising: creating difference vector C of n dimensions which is the difference between good part vector A and defect vector B; identifying m components of vector C having the largest magnitudes; creating vector D of m dimensions whose components are the n values in array C'_i ; and normalizing vector D to form vector E; forming vector I by the method comprising: creating vector G which is the difference between vector A and vector F; identifying m components of vector G which correspond to the same values for p_i as the m components for vector F; creating vector H of dimension m having as components only the m components; normalizing vector H to create vector I ; and forming dot product DP as provided in equation: $DP = E \cdot I$ (claim 23) is not disclosed, suggested, or made obvious by the prior art of record.

Dapiran et al. (USP 4,196,620) disclose apparatus for the dynamic testing of a pair of meshing gear wheels, one driving and one driven, of the type comprising first and second rotary support means one of which carries the driving wheel and the other of which carries the driven wheel, the two wheels meshing with one another, motor means for driving one of the wheels to rotate, braking means for restraining the rotation of the other wheel, accelerometer means being associated with the first and/or the second support means to detect the vibrations of the relevant wheel perpendicularly to its axis of rotation and for providing electrical signals representative thereof, means for

processing the electrical signals produced by the accelerometer means, and means for the visual display and/or recording of the processed electrical signals.

Wisniewski (US 20040254752 A1) disclose a method for evaluating defects in a product that defines an array of components. This broader method includes inputting risk factor data into a memory such as a computer readable memory, and inspecting at least one region of the product in accordance with the risk factor.

Ozaki et al. (USP 7187423) disclose a display and a method for repairing defects of the same in which defects such as inter-layer short-circuits and short-circuits in a single that have occurred at steps for manufacturing the display can be easily repaired to provide a good product with a high probability.

Ono et al. (USP 6,775,817) disclose a method and system are provided for analyzing defects having the potential to become electrical failures, during the inspection of particles and/or pattern defects of a wafer used in the manufacture of electronic devices such as semiconductor integrated circuits. Defect map data is processed along with failure probability data. Next, defect-dependent failure probability calculations are made to obtain the failure probability of each defect in the defect map data. That data is then used to prepare failure-probability-added defect map data.

However, Dapiran et al. Wisniewski, Ozaki et al., and Ono et al. do not disclose wherein steps of creating defect vector B of n dimensions whose components are the n values in defect array B_i ; determining array F_i of n numerical values that characterize a test part that may have an unknown defect using the numerically quantifiable physical property; creating vector F of n dimensions whose components are the n values in array

Art Unit: 2863

F_i ; forming dot product DP as provided in equation: $DP = B \cdot F$. Dapiran et al., Wisniewski, Ozaki et al., and Ono et al. also do not disclose wherein steps of forming vector E by the method comprising: creating difference vector C of n dimensions which is the difference between good part vector A and defect vector B; identifying m components of vector C having the largest magnitudes; creating vector D of m dimensions whose components are the n values in array C_i; and normalizing vector D to form vector E; forming vector I by the method comprising: creating vector G which is the difference between vector A and vector F; identifying m components of vector G which correspond to the same values for p_i as the m components for vector F; creating vector H of dimension m having as components only the m components; normalizing vector H to create vector I ; and forming dot product DP as provided in equation: $DP = E \cdot I$

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
